

NORTH AMERICAN FIRE HOSE

The difference is...*your* margin of safety.

IAP-600 LDH™

Polyurethane (TPU) Lining / Polyester Double Jacket

INDUSTRIAL ATTACK 600 PLUS LDH™ FEATURES

- **Poly-Cord™** ring-spun polyester warp yarns are combined with filament polyester filler yarns.
- Available either plain/uncoated “natural” white, or with our optional **Ultra-Shield™** high performance polymeric coating applied to seal each and every fiber in the bundle, further improving the abrasion resistance, reducing moisture and chemical absorption, and providing vivid color-coded identification.
- The **Dura-Thane™** polyurethane (TPU) inner lining is extremely light weight and compact, and is an approved material for safely conveying drinking water.
- The **Friction Fighter System™** in **Industrial Attack 600 Plus LDH™** creates an extremely smooth waterway surface, thereby significantly reducing friction loss and improving flow characteristics.
- With less weight and more compactness than nitrile rubber-covered single jacket reinforced hose, **Industrial Attack 600 Plus LDH™** loads more tightly and requires less hose bed space, while at the same time providing more pressure capability, maneuverability and flexibility.
- Designed to accomplish three separate fire fighting roles, including, Attack, Relay and Supply applications as defined by NFPA 1961, requiring a higher margin of safety than is possible with nitrile covered hose.
- Both the hose and couplings are made in the USA, performance shall meet and exceed NFPA 1961 standards.

Applications include: Attack, Relay and Supply
Available in 25, 50, 75 and 100 foot lengths

 **FAMILY OWNED
AMERICAN MADE**
